THE GREEN BOX - self watering vegetable & herb tray -

THE GREEN BOX - Instructions -

Green roof designs: 083 3986902 – email: cgreenstone@mweb.co.za

HOW IT WORKS: The tray holds 60 litres of soil in the top half and 15 litres of water in the bottom reservoir. The self watering tray draws water up from the reservoir, which supplies the plants with consistent moisture and avoids nutrient loss associated with regular pots.

Plant your chosen vegetables and herbs in a good soil mix in the top half of the Green Box and then fill the reservoir with 15L of water. You will only need to fill the reservoir every couple of days instead of watering everyday.

Remember to monitor and top up the reservoir to ensure your plants have as much water as they need.

Plant guide:

Basil (12 plants)	Lettuces (12 plants)
Beans (18 plants)	Onions (12-18 plants)
Broccoli (2-4 plants)	Peppers (2-4 plants)
Brussel sprouts (2-4 plants)	Swiss chard (10-12 plants)
Cabbage (2-4 plants)	Tomatoes (2-4 plants)
Brinjal/ Eggplant (2-4 plants)	Pak choi (6 plants)

Grow vegetables and herbs
even if you have limited space or no garden
Ideal for balconies, sundecks, patios,
driveways, flat roofs and pavements

These home ideas will add the perfect touch to your home.

DIY and home improvement jobs are great to do. They can provide a sense of self satisfaction and sheer pleasure that you actually did it yourself.

Hip roofs usually have a consistent level fascia, meaning that a gutter can be fitted all around. The overhang of the roof at the wall is called the eaves.

since 2002, the number one UK green roof website providing information and resources on green roofs and green infrastructure
